

Environmental Policy

Pritchitts shall, through the efforts of management and employees, endeavour to care for the environment. Pritchitts recognises that good management includes all environmental matters and will ensure that environmental protection and the prevention of pollution form part of all decisions, policies and practices.

Pritchitts works towards the following objectives:

- Minimise both energy and raw material usage
- Invest in the latest available environmental technologies
- Avoid pollution to land, air, water and nuisance
- Use suppliers with proven environmental/ethical track records and, where possible, only use materials from renewable sources
- Continually strive to improve employees' working environment
- Work to ensure that all aspects of operation have a minimal impact on the environment both locally and globally
- Observe, and where possible, exceed environmental regulatory standards; employ best environmental practice and develop a programme of continual improvement
- Ensure that all employees are regularly trained in an environmental awareness programme
- Work with government and non-governmental bodies to champion best environmental performance
- Constantly seek to improve efficiencies and the environmental performance of Pritchitts' operations
- Work with suppliers and contractors to ensure that the highest standards are maintained
- Endeavour to foster openness, dialogue and discussion with employees, customers, suppliers, contractors and all other stakeholders regarding the environmental performance and environmental targets and objectives of Pritchitts. To ensure this Pritchitts shall use all necessary means to allow transparency of environmental records
